## Spectator Section Protocol

If you are new to the sport of observed trials, you should be aware of certain spectator do's and don'ts:

- Please stand outside the boundaries at any section you are watching.
- Do not block a section entrance or exit.
- Dogs must be on a leash.
- Make sure that you position yourself so that you won't interfere with the view of the riders or the section official who are scoring the riders. Check with a section official if you have any doubts.
- Please move promptly if asked to do so by a section official.
- Do not disturb any of the section or course markings.
- Do not talk to riders while they are walking a section. They are concentrating on selecting and memorizing a line to ride.
- Please be careful not to knock rocks into a section. If you do, please notify a section official immediately.
- You may cross a section when it is safe to do so, but please be careful not to alter the section. Watch out for your personal safety. Sections are often slippery.
- Do not assist a rider in a section.
- Please applaud or cheer a fine performance in a section.

## Trials Scoring

The object of observed trials is to ride a specified piece of ground with entry and exit gates and side boundaries (known as a section). The rider with the lowest score is the winner. Points are allocated as follows:

A competitor's final score for each event will be the total scores of his rides. The numerical score will increase from a starting score of zero (0). Final overall and class places will be inverse to the numerical score. In the event of a tie, the competitor with the most "cleans" (zero points lost) will be declared the winner. If there is still a tie, go to 1's.

A rider shall be penalized only for the error he commits which carries the greatest number of penalty points, i.e., penalties in any given observed section shall not be cumulative (except for the first three dabs).

- Footing once ..... 1 point
- Footing twice ..... 2 points
- Footing more than twice ..... 3 points

### Failures

- Moving backwards ..... 5 points
- Crosses or breaks a boundary ..... 5 points
- Dead engine, with support ..... 5 points
- Handlebars touches the ground ..... 5 points
- Both hands not on handlebars while footing and stopped ..... 5 points
- Dismounting ..... 5 points
- Crossing tracks (complete loop) ..... 5 points
- Receiving outside assistance in a section ..... 5 points
- The rider changes the severity of a section ..... 5 points
